**There are no “trick” questions. When I give you dates and figures, they are generally correct.**

The determination of whether an answer is wrong or right will not depend, for example, on the date being 1764 or 1765, or the number of British pounds sterling being £10,000 or £11,000. However, if the question or answer states a colony is northern or southern, or whether a country is a Catholic or Protestant, that is a VERY BIG difference, and you are responsible to know that.
