Student Evaluation of Instruction

The only module in Moodle which allows for **completely anonymous student participation** (even though you are logged into Moodle with your L# and PIN) is this Questionnaire Activity, specifically set to anonymous mode, which I have done.

I'm asking you to complete this "Moodle" version of the standard class evaluation survey. My reasons:

1. Issuing this survey in class, when it could so easily be done online, takes away from valuable class time, which students have already paid for. Class time should be spent on the course material.
2. There are other significant costs related to producing, collecting, and reporting this data in a paper version. The expense of staff time and costly scantron forms could be saved.
3. I believe all of these student surveys at LCC should be done online. After all, one of LCC's core values and strategic directions is sustainability. Even though paper can be recycled, why use it in the first place if you don't have to?

I appreciate your giving me honest feedback about my teaching. In return, students who complete BOTH this survey AND the Hybrid Course Questionnaire will earn a 1 percentage point boost to their final class grade.

1Rate the 12 questions below

Average rank				

	Strongly Agree	Agree	Disagree	Strongly Disagree	Do Not Apply
1. What was taught agreed with the objectives stated in the catalog or course outline.					
2. The instructor exhibited an enthusiasm and interest in the subject.					
3. The instructor was knowledgeable in the subject.					
4. The instructor used class time effectively.					
5. The instructor respected people including those of different genders, religions, ethnic backgrounds, class status, abilities, and lifestyles.					
6. The instructor encouraged students to think.					
7. The instructor's					

teaching methods were effective in helping me learn the material.	
8. The instructor made an effort to be available to students.	☐
9. The instructor helped students understand the course material and find answers to relevant questions.	☐
10. The instructor treated students fairly and reasonably.	☐
11. The instructor encouraged students.	☐
12. Overall, the instructor was effective. Consider both the limitations and possibilities inherent in the subject matter and course.	☐

2

What did you like about the class?	
#	Response

1	Joe Escobar is a good speaker, and his enthusiasm as it rubs off unto the student and you find yourself enjoying as you learn.
1	I found it to be very informative.
1	The material
1	I really enjoyed this class, personally Escobar is a great professor! He keeps to his <u>syllabus</u> and does everything he will. This class was very involved in and out of the class. The learning experience was great because of how interactive this course was in class discussions and online forums.
1	I think Joe is really cool. Because he is trying to show us there are different bias in life that who ever publish or speech opinion of themselves. It might not always be true, there have to find out the backgrounds of the writers to have a understanding of in what kind of thoughts they had when write about the subject.
1	I really enjoy Escobar's enthusiasm with history. He does a job of teaching us in a well rounded way. I especially enjoy he points out bias in the textbook, outside sources, and his own opinions. He does a great job of keeping history interesting by tying to modern day consequences. The forums are a great way to expand on certain conversations that come up in class. I like that we do this type of thinking outside of class. It lets students take more time to get a clear understanding of their view and support it well. Honestly, I think Escobar is a great instructor and I have signed up for the next section of the class before even taking the final from this term. I wish I would have had a history teacher like this in my earlier education. He also, he makes a point to help if you ask for it. He helped me organize a study group and even came and answered questions for us. This was above and beyond my expectations for an instructor. RAD!
1	Everything. He is an excellent instructor and presented information in an easy to understand way.
1	How precise the class structure was.
1	I liked how organized it was, that was helpful.
1	Everything. Very well organized.
1	Well done, enjoyable teaching style.
1	Enjoyed the videos and extra materials used during class time. I found the information thought provoking and provided a broad spectrum of varying opinions. I learned more being exposed to different points of views from my fellow classmates as well as, from reading and hearing the different points

	from the colonists, British, French, Native Americans, Black Americans, slaves, farmers, merchants, varying political etc. I see the history of our country as even more complex now, and have a broader concept. Much of it made me : Great Class and Thank you
1	I liked the material because ive always been interested in american history
1	I liked that there was a reasonable component to understanding motives of the figures of American history.
1	The way Escobar teaches. Keeps me from falling asleep
1	This course was outstanding. I am currently taking Western Civilization and US History. Joe Escobar's ability to teach and impart knowledge is amazing. I cannot think of a single class, where I was not interested in what he was saying or presenting, or playing (video). I believe this is due to both knowledge of the subject matter and his ability to teach. a no-nonsense approach and doesn't skirt relevant issues, tackles them head on, in a matter that captivates the student's attention.
1	I enjoyed the instructors enthusiasm when it came to the material, also liked his many different ways of teachings, including using maps and lots of photos for students who learn better through visual aids.
1	The instructor was a very good teacher and he knew everything about the subject.
1	it made me see and think about history differently than i was taught in middle and high school.
1	I learned a lot more detail of history that I never learned in high school.
1	I liked how it involved a hybrid concept to the standard classroom structure. It required me to get involved in the online format which helped me throughout the term. The video clips and extra reading files were all worth my time in reading and listening to because they were as relevant to each topic we would be on in class. Joe would not waste a point in his lectures and would only point out what we were supposed to know for the midterm and final.
1	The chapter quizzes each week. they helped refresh information
1	I have a hard time with history but loved the lectures. They were fun and not boring
1	I like that there is a portion of the class that is online. The instructor teaches in a way that keeps the students engaged and doesn't require everyone to vocally participate.

1	The material was engaging, and the online forums were thinking about and understanding it.
1	I enjoyed the class as a whole, i never felt bored and was hooked on what was being talked about during the lecture. instructor Joe Escobar was a great teacher and i can say i learned a lot from him.
1	Hey Joe, thanks for a great term. The format is awesome. your teaching methods worked well. Your method of showing several sides really helps as well.
1	This was my first "hybrid" class I've taken at LCC. I didn't find it too different than a normal class. It was an easy transition from non-hybrid to hybrid. I liked the way the class was workload wise. It fit well with the rest of my schedule (12 total). I felt like I learned quite a lot. That required reading textbook religiously, paying close attention to lecture and my notes, and reviewing for exams.
1	Everything. I loved the teaching style with multiple formats used to express the material. Also, history is my favorite subject so it was hard to be let down.
1	I think the online forums are a great learning and teaching method.
1	I enjoyed the teacher for this class I think that it really helped me overall with the feel for it.
1	It was fun.
1	I enjoyed Joe's enthusiasm for the subject.
1	I think what I actually liked most was Professor Escobar's interest and knowledge about all of the topics! Instead of just reading us the slides, he would stop and discuss everything that was understandable and "normal" lingo instead of the confusing and boring way that the book addresses everything. Because the teacher actually cared about the subject, it made me care and be more interested than I expected.
1	that the class covered numerous topics and details that I didn't know about the country what it is and stands for today.
1	I liked that it was a hybrid class. that we could do our work more than once. also the instructor encouraged the students to ask questions.
1	I appreciated how Joe brought in videos of other historians who were experts on the subject of that day. Also I appreciated the effort Joe made to show multiple sides of an issue.
1	I've always enjoyed taking history classes every since I started college. Professor Escobar made it easy to be engaged in class.

	I was able to take a lot away from what we learned. Pro Escobar's enthusiasm made each class period interesting and enjoyable. I look forward to having him as my professor as well!
1	Information was presented in an accessible way and ne seemed condescending. Instructor answered questions accessible and friendly way. Overall one of my best coll experiences yet.
1	The class flow, and involvement the teacher used to inv students.
1	The thing that I liked about this class is that Joe didn't ju the book to teach us. There were some times when the information that didn't seem quite right or the author exp strong opinion of theirs through the book and Joe would that out.
1	I liked that the instructor was organized and communica He made it clear what the expectations were, provided a time, and remained consistent in with deadlines. I enjoy he presented the information, the lectures where inform moved along at an appropriate pace and incorporated information from a variety of sources, bringing history to present day.
1	..
1	The teacher reminded me of my high school history teacher a lot of ways. But he made learning very interesting and a quizzes helped to learn more information and to help me what I have learned and what I need to study more.
1	i liked how the videos were always relative
1	instructors enthusiasm

3 How could this class be improved? Add any comments about the class and/or instructor that you feel might be helpful or useful.

#	Response
1	I believe Joe Escobar runs his class professionally, and no additions needed.
1	I understand this is a hybrid class, but it's a great assurance to make that everybody has a computer, let alone Internet access. I understand we can use the library on campus, and it's part of the learning process, but I resist the notion of society's increasing dependence on the Internet. Not to mention the socioeconomic "standards" being set. (i.e. how do you survive without a

	phone?) Soon we'll begin losing our limbs due to atroph become pods in front of a screen....then monkeys will ta
1	Too much information required to remember for mid-term finals. More quizzes would help retain knowledge instead cramming everything in for a single exam.
1	I felt like this class was great, little help needed. Professor Escobar is good about communicating with his students class or via email. He also keeps with the <u>syllabus</u> which as a great guideline, and is always up to date on Moodle
1	Maybe a little bit longer class time would be great.
1	Sometimes I feel like there can be a lack of great debate forums. I'm not sure how Escobar could fix this problem put a lot of effort into my posts, and generally there isn't response to them in the forum. Perhaps if students were a little harder, or graded more strictly on their forum posts would try harder to engage with the other students posts
1	I can't think of anything...
1	ADD EXTRA CREDIT OPTIONS and make the forums more important.
1	The forums were kind of confusing. And I didn't know if I liked how everyone had to reply to each other. If each person had to make one post it would have been better.
1	Can't think of anything
1	Weeks 3 and 4 the forums were not graded half way through the week that freaked me out a little bit as it was too late to make more posts by the time any grading was done.
1	I really didn't like the online forum part of the class. Hard on top of it.
1	I would say maybe the inclusion of more I-clicker questions keep some of the students including myself even more interested in the subject matter.
1	Get rid of the forums. Waste of time in my opinion.
1	The only way I think this class could be improved would be to have any bumps in the grades. Students earn their test scores. Anybody who does not succeed in this course has not truly notched class!
1	I would have made the forums due on Thursday and Sunday instead of the Tuesday and Sunday. I would also have reduced the Midterm and Final not as large of a portion of the grade. Students like myself have trouble testing and when I was

	students who don't put in any effort in the Forums and o classwork because they can ace the midterm/final I feel working my ass off to pass just because I do poorly on t Not because I don't put in an A effort in all my class wor
1	More class interactions and projects IN CLASS not just
1	sometimes i personally would like more discussion opin the class to instructor
1	I would have liked to have more interaction in class to h the material other than lecture with different video clips ; images.
1	The only suggestion that I have for this class is to provid longer time period during lecture, giving students more t take notes off of your slides since you do not post all of in moodle.
1	Going over the forums and having class discussions abo would've been helpful.
1	I had a hard time with the forums but they worked for ot people
1	There is nothing I would change about this class.
1	I found the instructor's tone to be a little belittling at som might just be nitpicking at this point, but I couldn't decid instructor was trying to be funny for a little comic relief, c was being a jerk. His tone can be abrasive at some poin feel that's just his personality. He had a stern attitude, b enforce that at all times. Class went off track at times, th the term, that took time from his well timed lecture. If the would only ask relevant questions during lecture time, o instructor stuck strictly to relevant issues, then more ma could be covered.
1	The reading material choice at times was a lot at once, I all so interesting.
1	Fewer in-class videos.
1	I think some forum changes would help the class out a l
1	Don't change at thing!
1	I truly feel Joe is running the corse superbly.
1	I really like how this class was set up and the only imprc that I could possibly think of would be a normal class da instead of going over a chapter we do somewhat of a fir however I understand that fitting everything into one ter hard enough as it is. So in that case, I have no complair

	think that it was a great class.
1	I believe that the online forums need to be improved or I and instead make the class longer and more discussion I don't believe one benefits from getting a score on a forum I think class discussion would help students actually learn topics that the forum questions are based on.
1	Less ranting on the inability to find historical truth and m history.
1	The only thing that I think might have room for improvement would be explaining the forum a bit better. I was a little confused as to how we should format the forum and what was expected the beginning. Aside from that, it was a great class!
1	The timeline for chapters ended up being a little weird sometimes. Starting a new chapter on Thursday and finishing on Tuesday which was a little hard to retain that information. Also, I'm not a huge fan of forums, but that is more a matter of opinion.
1	The anonymous polling could be used throughout the class.
1	The only thing that I didn't really like was the online forum. However, they did get easier to do farther into the term I understood more what we were supposed to do.
1	Perhaps the forums could be discussed or wrapped up in a way I would of liked to have some sort of weigh in from the instructor either during the forums or at the conclusion of each. Overall I thought this was an excellent course and I would recommend this class to others.
1	..
1	I can't think of anything to improve.
1	i dont think it could be
1	help the student understand what is needed to know and how to understand from and about the textbook.
