This goal seems safe.

I'm slightly wary, because it sounds like something Dilbert's boss would say.

But if I do understand it correctly, it's just saying "We will be intentional in our decisions, and respond to verified needs rather than perceived desires."

Since LCC is suffering financially, that seems a wise goal.

I think that Lane's commitment to needs-based decision-making and technical support is exemplary. As a teacher who was and is techno-shy, I more than appreciate the support I have been given to grow as a teacher who teaches with and through technology.

4. **Jeffrey Borrowdale** wrote,

How about adding "yet in a collaborative and transparent manner." There should be some general reference to these features which are detailed in the Technology Decision Policy.
