Lab Notes (March 30, 2005)

The evening progressed quietly tonight. I finished copying the CS 101 CDs and left the stack in the drawer (there are just under 40 of them). Work continues on the VB Add User Script, and I will be setting up a dummy computer with active directory on it to run some tests in the days to come. The computer will live in CIT135 in the back corner.

Lab Notes (3/16/2005, 5p-10p)

Very quiet this evening, with only a few students returning to the lab after finals. Their comments indicated worry, relief, and satisfaction.

I dove into the VBS "add user" project and made serious progress.

The following sites discuss installation, what PHPESP can do, the results, and a few drawbacks.

<http://builder.com.com/5102-6371-5083365.html>

<http://www.eweek.com/article2/0,1759,1158467,00.asp>

CIT135FRONTX - The computer, SN 0704312, has returned to the lab, however, there does not appear to be any information on its repair by Computer Systems West. The computer was sent out because the zip drive would not work. As I understand it, this may not be a hardware problem but may actually be an operating system problem.

ZIP Disk Issue - If the zip drive does not see the disk use the following procedure to correct the issue.

Right-click the Zip drive icon and select Properties.
Select the Hardware tab.
Select the Zip drive the click on Properties.
Select the Volumes Tab the click on Populate.
Click OK twice.

The files on the zip drive will now appear.

Lab Notes - Shift 3 (March 9, 2005)

Dead week. It's busy--lots of questions about all sorts of things. Steve and I (and perhaps others I am unaware of) worked on a new autoexec.bat file for the ghost floppy disks. I ended up with a working prototype. The new disk does not require a reboot on a ghosting failure (such as the server not working), but rather asks the user if they want to retry the process. It uses errorlevels and simple logic.

No more CD checkouts--not until next term!

I found two floppies in room 132, one blue and one yellow (both unmarked), and three floppies in room 120, one green (unmarked), one black (Penny Johnson?), and one red (cis 101 summer?). I stored all of them in the drawer.

I noticed that in room 126 the clock's seconds hand has fallen off.

Lab Notes 8:00 a.m. to 1:00 p.m.

Excess Property - 12 computers were brought in and are waiting to be picked up by LCC's excess property team.

LCC Internet Upgrade - Jason has indicated to me that LCC's Internet T1

line will be upgraded to a fiber optic line on Sunday the 13th starting at 8:30 p.m. During the upgrade, LCC's web sites may not be accessible. If you experience problems accessing LCC's web sites during that time please try again later.

Tue Mar 08, 2005

tues march 8

Very busy afternoon. Placed a new new tomer cartridge in CIT 135 printer. We also worked on the batch files that we are writing for Ghost. The first four computers in the first row, right side have had JGRASP Version 1.7.5 installed onn them at the request of Linda Loft.

Fri Mar 04, 2005

Lab Notes 8:00 a.m. to 1:00 p.m.

Student Wallet Lost/Stolen - Ms. Deidre Blevins came in this morning around 8:30 asking if her wallet had been turned in. She believes it was taken from her backpack in the CIT135 lab on Thursday, March 3rd, between 12:00 and 5:00 p.m. I checked the locked drawer but no wallet was found. I then called security and they checked for a wallet being turned in on the 3rd but found nothing. Ms. Blevins said she would go home and begin contacting her credit card companies and her bank to report the loss.

Thumb Drive Found - A student, Robert Harris, forgot to remove his thumb drive from the computer when he left the CIT135 lab. I have sent him an e-mail and called his home at 541-687-9706 and left a message. NOTE: MR. HARRIS MUST SHOW A VALID ID IN ORDER TO CLAIM THE THUMB DRIVE.
UPDATE: The student came in and identified himself so I turned the thumb drive over to him.

Virus Scan - I used Trend Micro's "Housecall" to scan the hard drive of CIT135FRONTX. It found 8 viruses and 1 Trojan/Worm. I deleted all but one virus, it was undeletable, and the 1 Trojan/Worm should have been deleted but the status is unknown. When I went to manually delete the remaining file C:\Program Files\ISTsvc\istsvc.exe it would not allow the file to be deleted, however, I was able to delete the file and folder by booting into Safe Mode.

Wed Mar 02, 2005

Lab Notes 8:00 a.m. to 1:00 p.m.

Student Schedule - Helen brought in a printout of Jackie Hughes Spring class schedule. If Jackie should show up, we should return the printout to him. Otherwise, we should give the schedule back to Helen before she leaves today.
