

AppleScripting the iApps!

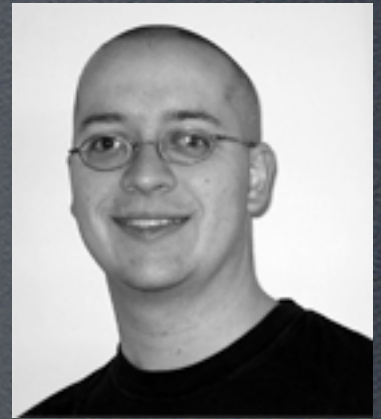

Thursday, January 13th 11:00 AM - 12:15 PM

Benjamin S. Waldie
President, Automated Workflows, LLC

About Me

Benjamin S. Waldie

- President, Automated Workflows, LLC
- Columnist, MacTech Magazine
- Contributor, MacScripser.net
- President, Philly Area AppleScript UG
- Author, SpiderWorks, LLC

Session Overview

- Introduction to AppleScript and Scriptable Applications
- AppleScript Functionality in the iApps
- Getting Started with Basic iApp Scripting
- iApp Scripting Demos
- Resources and Next Steps

AppleScript

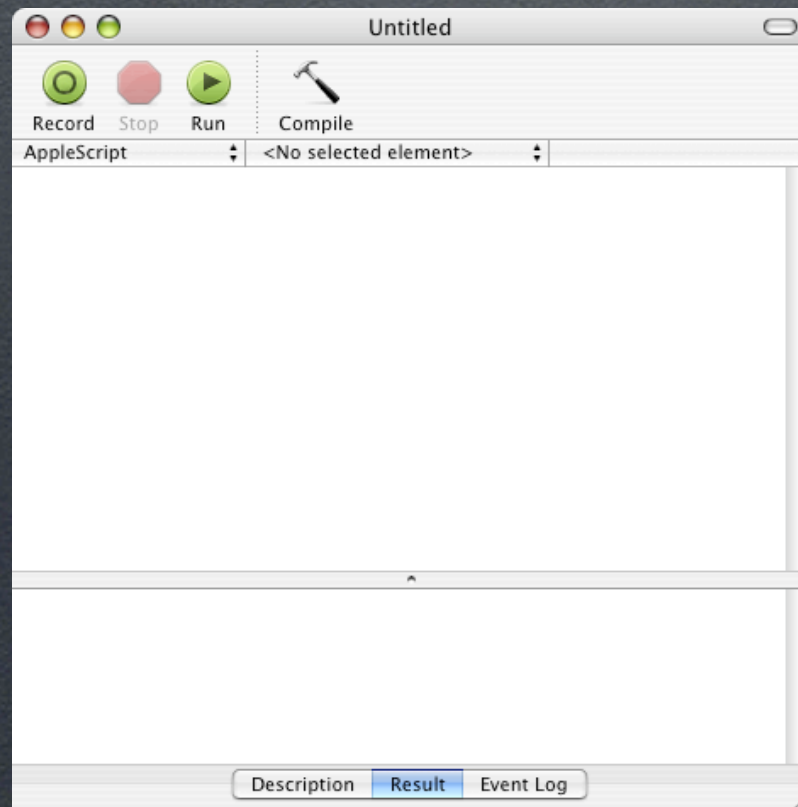

What is AppleScript?

- Built into Mac OS X
- Used to control existing applications
- Automates time consuming and repetitive tasks

Writing Scripts

- Script Editor
 - Located in “Applications > AppleScript” folder

Scriptable Applications

- Applications must support AppleScript
- Scriptable Applications include an AppleScript dictionary
- Level of AppleScript support may vary from application to application
- Terminology may change between versions

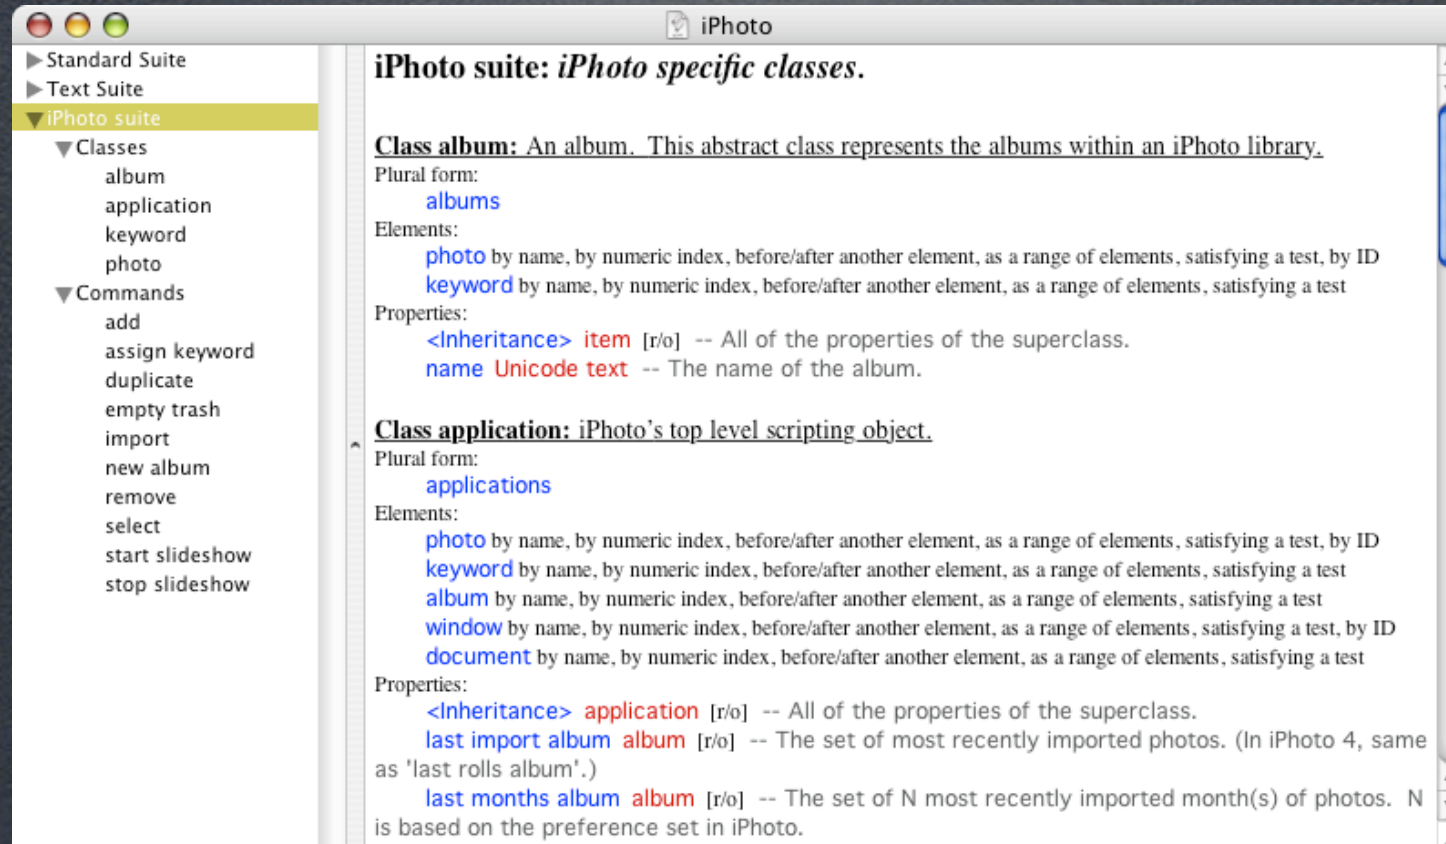

Viewing Application Dictionaries

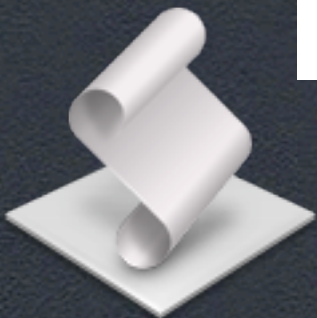

- Launch Script Editor
- Select “Open Dictionary” from “File” menu
- Locate and select desired application
- Library palette provides quick dictionary access for commonly used applications

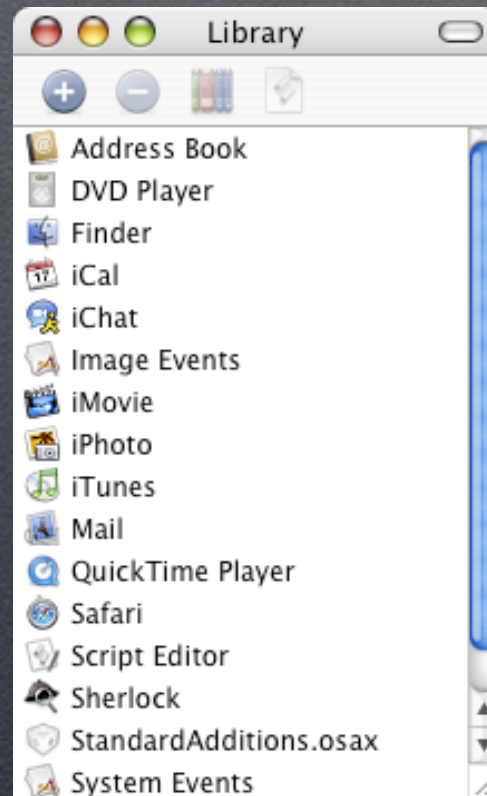

Viewing Application Dictionaries

iPhoto Dictionary Window

Viewing Application Dictionaries

Library Palette

Scriptable iApps

iChat

- Login and Logout
- Change Status
- Change Picture
- Send Messages
- Integrate with Other Applications

Hands On Scripting

iPhoto

- Batch Process and Convert Images
- Import and Export Images
- Assign Comments and Keywords
- Trigger Photoshop Actions
- Integrate with Other Applications

Hands On Scripting

iTunes

- Import Tracks
- Adding and Extracting Track Information
- Manage Playlists
- Generate CD Inserts
- Integrate with Other Applications

Hands On Scripting

iCal

- Schedule AppleScripts
- Trigger Alarms in iTunes
- Enter Events
- Extract Events
- Integrate with Other Applications

iDVD

- Align, Delete, and Move Interface Elements
- Build iDVD Projects
- Create Slideshows
- Integrate with Other Applications

Other Scriptable Apps

- Address Book
- Image Events
- Mail
- QuickTime
- Safari
- Third Party Apps

Non-Scriptable Applications

- DVD Studio Pro
- Final Cut Pro
- GarageBand
- iMovie
- Keynote (Scriptable with a Plug-in)
