There are no "trick" questions. When I give you dates and figures, they are generally correct. The determination of whether an answer is wrong or right will not depend, for example, on the date being 1964 or 1965, or the number of troops being 15,000 or 16,000. However, if the question or answer states North or South Vietnam, or whether a President is a Democrat or Republican, that is a VERY BIG difference, and you are responsible to know that.

U.S. aid did little to promote economic development or improve conditions in the villages where more than 90% of South Vietnam's population lived. Moreover, the commercial-import program was enormously wasteful and actually did more to hamper the successful implementation of a financial program in Vietnam in the 1950's. It fostered dependency rather than laying a foundation for genuine independence.

Herring states that there are two origins of the insurgency against Ngo Dinh Diem that swept through South Vietnam. One focuses on the aggression from and determination of North Vietnam to impose communism on the South. The other is that the revolution sprang up in response to Diem's oppressiveness and grew in strength without significant support or direction from the north. Herring concludes that the truth is probably far more complex than either of these extremes.

90 🦁 The limited success of strategic bombing in WWII and Korea should have raised serious questions about its use in Vietnam.
