

University of Oregon Bachelor's Degree in Geography

Thursday, June 4th at 4pm, in the Center Building 455 Room 455

Leslie McLees, the Undergraduate Coordinator for the Department of Geography at UO, will host an informational session to help you navigate the transfer process and answer any questions you might have about geography at the UO. Two former Lane students, Geoffrey Marcus and Justin Harris, now in the Geography program will also be available for questions.

This session will provide an overview of the major, how courses transfer into the geography program, and the experiences and opportunities that UO Geography provides. They can also cover more general questions about general education requirements and transferring that you might have. There will even be snacks!

If you have any questions, please contact Leslie McLees at geogadvr@uoregon.edu. Otherwise, Leslie, Geoffrey and Justin look forward to meeting you on June 4th at 4pm in the Center Building room 455.

Environment and Society

Using a critical approach and working across the globe, UO geographers emphasize the inseparability of environmental and socioeconomic change as our surroundings evolve through space and time.

The Natural Environment

The Natural Environment core area in the Geography Department focuses on the processes that shape the physical features of the landscape.

Geographic Information Science

Geographic Information Science within Geography provides students with both the conceptual knowledge base and the technical skills to develop and conduct geospatial analysis and data visualization.
