

HUMAN GEOGRAPHY Questionnaire

7. What do you think should be changed to make it better?

Questions to answer 7

- Field trip in the beginning of the term, for the fact of getting to know people would make our group projects easier
- Defined note taking time
- Better study guides and test prep
- IDK-first time taking geography
- More field trips
- A solid map to study off of or perhaps knowing how many countries are for each test. I missed a couple of small ones personally
- If we could follow along in the book together more
- Again I go back to the disrespectfulness of the students. Those kids these days have no respect. I am very disappointed in the discipline of our youth as well as the disciplinary actions against these kids.
- A little organization and clarity
- Maybe more time in class to study certain topics. Also more time in class to do group studies for the different sections in the book
- I noticed in an early class that most people around me could not identify many states in the US. I think one map quiz should be dedicated to this. Even just for extra credit maybe.
- More student interaction/ideas from them with our topics. Such as group discussions/thoughts, then bringing those to the class as a whole and comparing.
- Not allowing Neil to speak about so many stupid things and his feelings all the time! He is nothing but a kiss up with no one else to vent to so he feels the need to do it to teachers who will listen and DISRUPT the class so much! Every class was like this!
- Better use of time
